

LOG-200

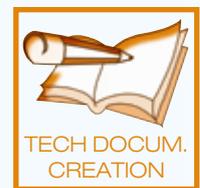

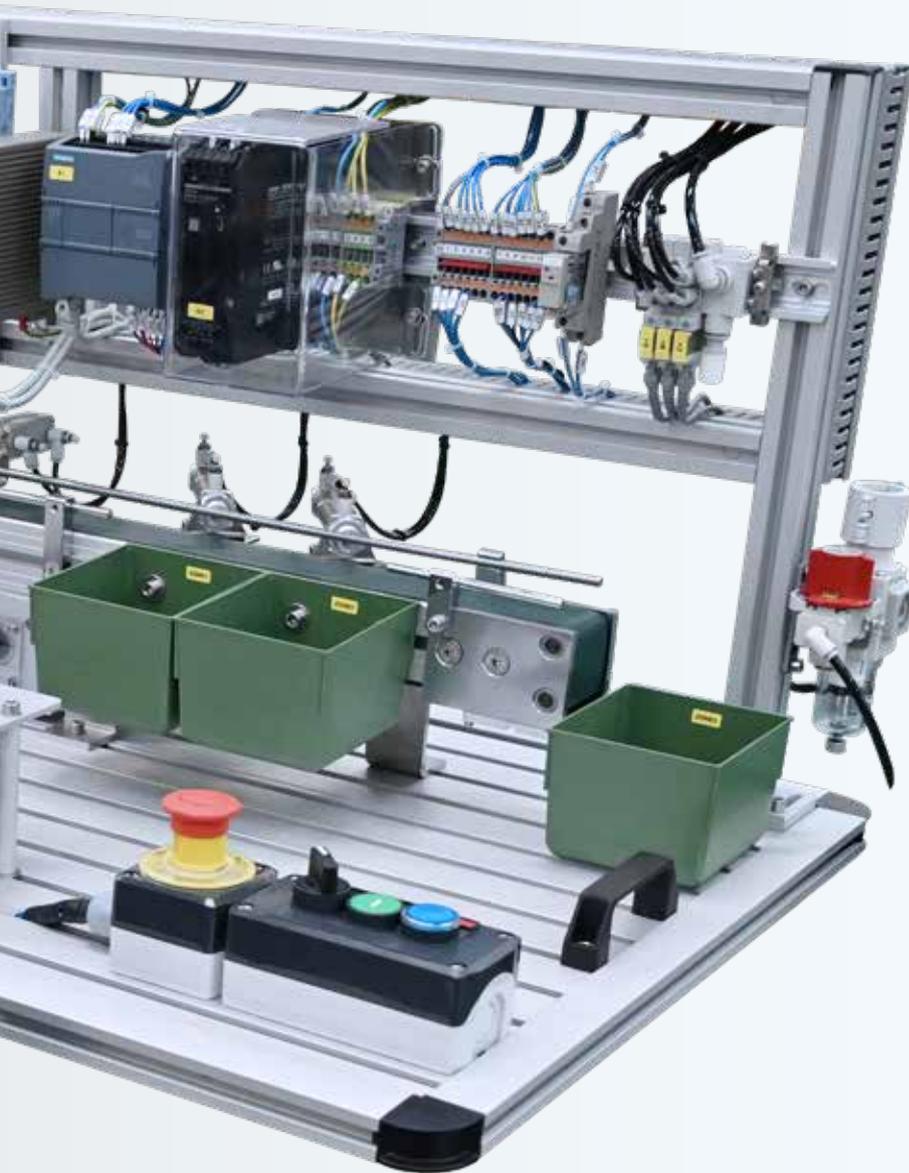

RFID logistics trainer

The trainer which includes RFID technology within the context of a logistics application

Compact and easy to use!

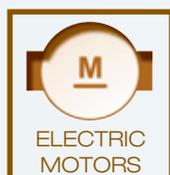

Develop the SKILLS...

Monitor deliveries from
your software application
over the Internet!

In the following TECHNOLOGIES...

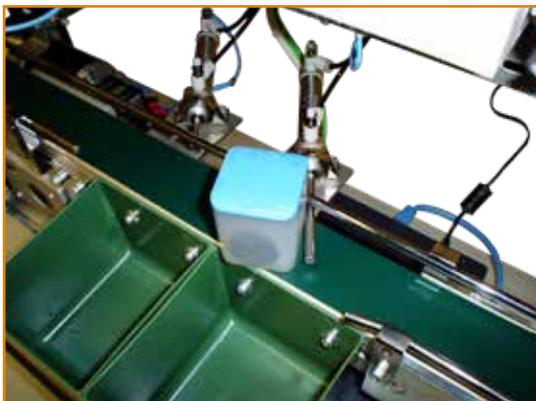

LOG-200 - RFID logistics trainer

LOG-200 is focused on studying RFID technology in a logistics application, using only industrial components. It also includes a Web server that can access the system over the Internet.

LOG-200 uses the following RFID devices:

- RFID read/write module - it enables reading and writing information in each of the tags.
- RFID Controller - It brings together and manages up to 3 RFID stations.
- “Tags” - They store the relevant information to maintain the traceability of objects.

LOG-200 displays the information contained in each “tag” through the RFID controller and the PLC sends the right information to each actuator to place each container in its correct location. In addition, information for each object can be accessed over the Internet by means of a Web server that communicates with the PLC.

• SAI2961	LOG-200 with Schneider PLC
• SAI2963	LOG-200 with Omron PLC
• SAI2964	LOG-200 with Siemens PLC
• SAI2965	LOG-200 with Allen Bradley PLC

LOG-200 includes 2 different software applications:

- Web server software - it can set up a website to track the object’s traceability over the Internet.
- SCADA software - sets up a remote application to read/write information on RFID tags.

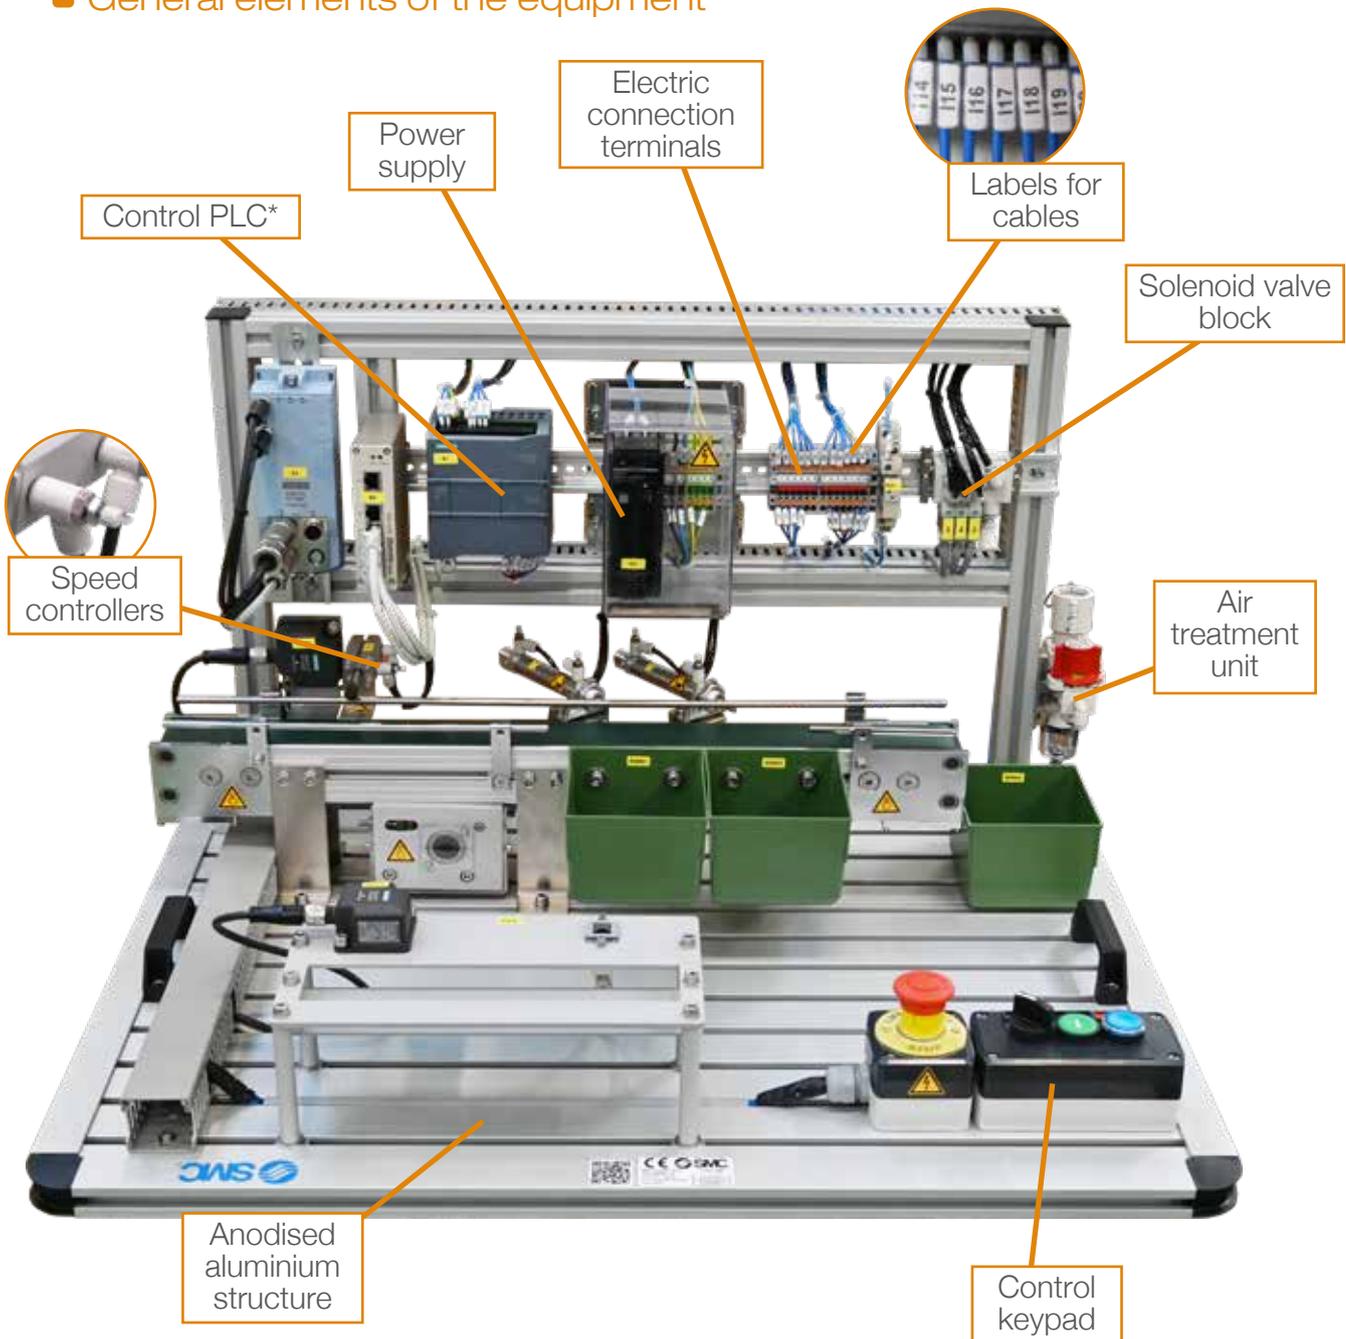

Web server software

SCADA software

■ General elements of the equipment

User manual

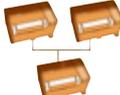

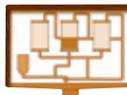

*Options: PLC Siemens, Omron, Allen Bradley, Schneider or without PLC.

■ LOG-200 - With this system you could...

LOG-200 comes up with different practical activities targeting skills in the technologies featuring in the table (below).

		TECHNOLOGIES				
		 ELECTRICAL PANEL	 ELECTRIC MOTORS	 IDENTIFICATION SYSTEMS	 INDUSTRIAL COMMUNIC.	 SCADA / HMI
SKILLS	 ANALYSIS					
	 DESIGNING					
	 TECH DOCUM. CREATION					
	 TECH DOCUM. UNDERSTANDING					
	 OPERATION					
	 PROGRAMMING					

- This shows how the LOG-200 is suitable to develop skills in the specific technology.
- This shows that LOG-200 can help develop skills in the specific technology even though there are other more appropriate products in the range.

@ eLEARNING-200

Find out more about the theory behind the technologies developed in LOG-200 with our eLEARNING-200 courses.

■ LOG-200 - Options

LOG-200 has a series of optional extras.

• Programming tools

The programming tools comprise the appropriate programming software and cables for the chosen PLC.

**See Programming Tools chapter*

• Support legs

Makes the system self-standing without needing a worktop or bench.

• SAI2968 LOG-200 LEGS KIT

■ LOG-200 - Configuration

Getting the right LOG-200 specification is as easy as

• Steps to follow

- 1.- Choose the equipment dependant on the PLC.
- 2.- Add any optional extras.

■ LOG-200 - Technical features

LOG-200 770x590x450mm	Modules	Sensors (type & quantity)	Input / Output
	Writing zone Reading zone Expedition	RFID (x2)	Digital 3/4
	Other devices (quantity)	Actuators (type & quantity)	
	RFID concentrator (x1) Web server (x1) Hub (x1) Circular tag (x5) Rectangular tag (x10)	DC motor (x1) Pneumatic linear (x3)
